INTRODUCTION

BACKGROUND

King Solomon, the son of King David, was one of the wisest and wealthiest kings in history. Reigning over a vast empire 970-931 BC, King Solomon wrote over two thousand five hundred poems and had seven hundred wives, including Pharaoh's daughter Naama and the Queen of Sheba (Ethiopia).

As the Kingdom fell, King Solomon ordered his subordinates to hide his extraordinary wealth deep inside underground mines. The mines reportedly contained over five hundred tons of pure gold, diamonds, silver artefacts and precious stones.

For centuries the legendary mines have fascinated generations of historians, archeologists, writers and filmmakers who have been continually searching for the buried treasure but, to date, the precise location of the excavations remain unknown.

CONTENT & CONCEPT

Our mission is to provide inspiring, entertaining and quality news items, specifically tailored for an affluent global Jewish readership.

Solomon Mines magazine acts as the 21st century reincarnation of the mines, as the exclusive information we provide is equal in value to the lost treasure. *Finally Solomon Mines have been found.*
